

I love the ease of listening to my local traffic and weather whenever I want, not just at "25 past the hour". XM Satellite radio gives me a variety of music i can listen to whenever I want with no commercials!! and the quality is great, better than boradcast! I pay for this out of my own pocket, That's like me buying apples and the produe mgr telling me that I can only make applie pie with them, I can't just sink my teeth into the apples... that's ridiculous!! I pay for this!!! the NAB and FCC should stick their noses elsewhere. The FCC should be out listening for terrorists awakening their sleeper cells, and not bothering paying consumers with this petty stuff, and fining people who are just trying to make a living. Leave Howard Stern alone!! FCC, I urge you to REJECT NAB petition 04-160
